SUMMARY

Aspiring GenAI / Machine Learning Engineer with hands-on experience building agentic RAG systems using LangChain, LangGraph, FAISS, and HuggingFace embeddings. Built and deployed CareerLens AI, an autonomous resume-analysis agent combining LLM tool-calling, semantic search, and a trained classification model. Strong foundation in Python, data preprocessing, EDA, and classical ML (Scikit-learn), with a growing focus on production-grade generative AI applications.

TECHNICAL SKILLS

Generative AI: LLM APIs (OpenAI, HuggingFace), Prompt Engineering, RAG, Embeddings, LangChain, LangGraph, FAISS

Machine Learning: Supervised & Unsupervised Learning, Logistic/Linear Regression, KNN, Decision Trees, Model Evaluation (Accuracy, Precision, Recall, F1, Confusion Matrix)

Data Science: Data Cleaning, EDA, Statistical Analysis, Feature Engineering, Data Visualization

Languages & Tools: Python, Java, C++, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Streamlit, FastAPI, BeautifulSoup, Jupyter Notebook, VS Code, Git/GitHub

PROJECTS

CareerLens AI — [Live Demo](#) · [GitHub](#)

- **Agentic system:** built an end-to-end agentic AI using a LangChain Agent that autonomously decides which tools to call based on resume analysis, rather than a fixed pipeline.
- **Semantic job matching:** scraped 241 real fresher job listings from Internshala (BeautifulSoup), embedded them with HuggingFace all-MiniLM-L6-v2, and indexed in FAISS for retrieval.
- **Shortlisting model:** trained a Logistic Regression classifier on 400 candidate profiles (MultiLabelBinarizer) to predict shortlisting probability and rank missing skills by impact.
- **RAG pipeline:** built resume Q&A with PDF chunking, FAISS vector search, and instant retrieval, plus a resume rewriter and personalised 30-day action plan generator.

Tools: Python, LangChain, FAISS, HuggingFace, Scikit-learn, BeautifulSoup, Streamlit

Rider-Order Compatibility ML System — [GitHub](#)

- Developed an ML system to recommend the safest rider for food-delivery orders using a workload-based fatigue scoring formula.
- Trained a Logistic Regression model achieving 82% prediction accuracy for assignment risk assessment, with ranking logic to recommend the lowest-risk rider based on working hours and completed deliveries.

Tools: Python, Pandas, NumPy, Scikit-learn

Movie Recommendation System — [GitHub](#)

- Built a content-based recommendation system using TF-IDF vectorization and cosine similarity on movie metadata, with a Streamlit interface for real-time personalised suggestions.

Tools: Python, Pandas, NumPy, Scikit-learn, Streamlit

EXPERIENCE

Machine Learning Trainee — Grras Solutions Pvt. Ltd.

Jul 2025 – Dec 2025

- Completed a 6-month industry training program in Data Science and Machine Learning, working on real-world datasets end to end.
- Performed data preprocessing, exploratory data analysis (EDA), and feature engineering; built and evaluated ML models using Scikit-learn.
- Deployed interactive ML applications using Streamlit and applied statistical analysis to extract insights from data.

Tools: Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

EDUCATION

JECRC University, Jaipur

Jul 2023 – Jul 2025

Master of Computer Applications (MCA)

St. George College, Bengaluru

Aug 2019 – May 2023

Bachelor of Computer Applications (BCA) · Affiliated to Bengaluru North University
